

Your Complete Source For...

Industrial Ductwork Solutions

Specializing In...

Quality • Delivery • Design • Service • Price

Quality • Delivery • Service • Design • Price

You will always see these five words associated with US Duct. They define our core values – and the real value we offer to our customers – a promise made to our customers, and kept, since the day we opened our doors.

A Full Line Of Industrial Duct

*Standard off-the-shelf components.
In stock. Ready for shipment.*

All ductwork, fittings, hoods and special parts to meet and complete any duct, fume or mist collection application. Elbows to end caps. Branches to ball joints. With everything in between.

Most components are in stock and ready for immediate delivery.

All materials. Carbon, Galvanized and Stainless Steel. All gauges. All sizes.

All styles. Rolled-lip clamp together, flanged, spiral duct or mixed.

Special Solution Products

Components and accessories to meet your special application requirements.

Our staff's years of experience has taught us both what works best – and how best to fabricate it – to meet and solve any special collection problem.

Our unique solutions include special hood designs, automatic gates of all sizes, silencers, oil mist curbs and accumulators, diverter valves, high volume oil/effluent systems fittings, plus the exclusive US Duct designed and fabricated SparkTrap.

Give us your special objective. Let us maximize both the capacity and performance of your system.

Custom And Special Fabrications

*From the heaviest to the smallest.
From your design or ours.*

US Duct can easily shift into custom fabrication mode – taking your design and building to your exacting specifications – or utilizing our design assistance to build to your specific objectives.

We're equipped to fabricate in all gauges, all materials, and all sizes from 1" up.

It sometimes takes up to five trailer loads to transport one of our fabrications – but, if we can build to these specifications, we can handle any special requirement.

Your Custom Component's Transportation Needs Are Met With Ease

With US Duct, Size Does Not Matter

Custom Cleaners

Standard Cyclones

Special Cyclones

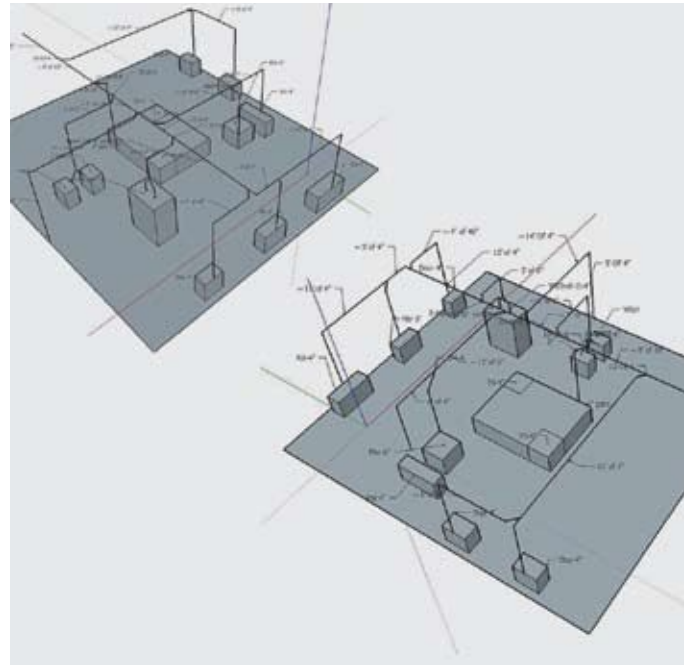

FREE 3-D Design Services

View your complete system, in three dimensions, from all angles.

Our collaborative design service allows you to "walk through" the entire design and installation process, make changes, and determine exactly what products you will need, how they will perform, and see precisely what your system will look like and deliver.

Your view is online, in real time, with features including Google "SketchUp" and Citrix "GoToMeeting" conferencing and interaction.

All we need to start are the dimensions of your production facility – and the locations of equipment.

We're Your Complete Solutions Source

A complete line of standard duct fittings. Special solution products. Custom fabrications from your design or ours. Free design services. We offer it all. So you don't need a number of different suppliers for a number of different objectives. We can do it all for you.

Facilities And Equipment

Our new 34,000 sq. ft. facility is strategically located midway between Winston-Salem and Greensboro, NC for fast, efficient shipping to all points north, south, east and west—and is completely equipped with the latest state-of-the art metal forming, metal cutting and duct fabrication equipment. Your order, your e-mail or your call puts all of these resources at your immediate disposal.
